Active Solutions Consulting Group

Active First Aid

Paediatric First Aid

Level 2 Award (QCF)

(2 days)

Course Syllabus

- Role & Responsibilities of a Paediatric First Aider
- Scene Safety, Surveys and Medical Assessment
- Managing an Unresponsive Casualty
- Basic Life Support & CPR
- Choking
- Wounds & Bleeding
- Shock
- Fractures and Dislocations
- Head, Neck & Back Injuries
- Eye, Ear and Nose Injuries
- Dealing with An Illness
- Effects of Heat and Cold
- Electric Shock
- Burns and Scalds
- Poisoning
- Bites and Stings

Our approved Level 2 Award in Paediatric First Aid training is intended for delegates who are already working or preparing to work with children and infants, and is also designed for leaders and monitors in clubs and associations that hold meetings and events for children.

All successful students will be issued with a Paediatric First Aid certificate, along with a wallet-sized plastic card detailing their qualification which is valid for a period of 3 years.

Learning Outcomes

By the end of the training session the attendees will be able to:

- Define their role as a paediatric emergency first aider.
- Describe how to minimise risks to themselves and others.
- Describe how to conduct a scene survey, a casualty assessment and call for help.
- Demonstrate how to administer Cardio Pulmonary Resuscitation (CPR) for children and infants using a mannequin doll.
- Describe how to identify and treat a choking casualty with a partially and completely blocked airway.
- Demonstrate how to control severe external bleeding.
- Describe signs and symptoms of shock and how to manage a casualty who is in shock.
- Describe how to manage a casualty with a burn and with other minor injuries.
- Describe the common types of fractures and how to manage a fracture or a dislocation.
- Demonstrate how to manage a suspected head, back or neck injury.
- Describe how to offer first aid to a child or infant with a foreign body in their eyes, ears or nose.
- Describe how to recognise and manage illnesses such as sickle cell anaemia, diabetes, asthma, meningitis and febrile convulsions.
- State the first aid protocols for handling burns, scalds, poisoning, bites and stings.

Our Company

Active First Aid Training provides first aid training to organisations throughout the UK and Europe. customers at different locations across the United Kingdom and Europe. Our training courses and services are compliant with guidance criteria provided to employers by the UK HSE and in accordance with European Resuscitation Guideline protocols.

We are an approved training centre, offering employers and organisations a level of assurance, as recognised by the HSE, that means that our training courses, instructors and procedures are regulated and adhere to strict requirements for the issuing of awards under the UK Qualifications and Credit Framework (QCF) for vocational qualifications.
